

Worked Examples

Topic 2.4: State Feedback

ENGM X304 – Applied Control Systems

Assoc. Prof. William Robertson

Dr Sean McGowan

October 3, 2025

Contents

1	Concept 2.4.1: Reachability	2
1.1	Example 1: Placeholder	2
2	Concept 2.4.2: Stabilisation	2
2.1	Example 1: Placeholder	2
3	Concept 2.4.3: State Design	2
3.1	Example 1: Placeholder	2
4	Concept 2.4.4: Integral Action	2
4.1	Example 1: Placeholder	2
5	Concept 2.4.5: Observer Design	2
5.1	Example 1: Placeholder	2

1 Concept 2.4.1: Reachability

1.1 Example 1: Placeholder

This section will contain worked examples for the Reachability concept.

Problem: Example problem statement will be added here.

Solution: Example solution will be added here.

2 Concept 2.4.2: Stabilisation

2.1 Example 1: Placeholder

This section will contain worked examples for the Stabilisation concept.

Problem: Example problem statement will be added here.

Solution: Example solution will be added here.

3 Concept 2.4.3: State Design

3.1 Example 1: Placeholder

This section will contain worked examples for the State Design concept.

Problem: Example problem statement will be added here.

Solution: Example solution will be added here.

4 Concept 2.4.4: Integral Action

4.1 Example 1: Placeholder

This section will contain worked examples for the Integral Action concept.

Problem: Example problem statement will be added here.

Solution: Example solution will be added here.

5 Concept 2.4.5: Observer Design

5.1 Example 1: Placeholder

This section will contain worked examples for the Observer Design concept.

Problem: Example problem statement will be added here.

Solution: Example solution will be added here.
