

Worked Examples

Topic 3.7: PID Control

ENGM X304 – Applied Control Systems

Assoc. Prof. William Robertson

Dr Sean McGowan

October 3, 2025

Contents

1	Concept 3.7.1: Feedback Control	2
1.1	Example 1: Placeholder	2
2	Concept 3.7.2: Simple Controllers	2
2.1	Example 1: Placeholder	2
3	Concept 3.7.3: PID Control	2
3.1	Example 1: Placeholder	2
4	Concept 3.7.4: Anti-Windup	2
4.1	Example 1: Placeholder	2
5	Concept 3.7.5: Implementation	2
5.1	Example 1: Placeholder	2

1 Concept 3.7.1: Feedback Control

1.1 Example 1: Placeholder

This section will contain worked examples for the Feedback Control concept.

Problem: Example problem statement will be added here.

Solution: Example solution will be added here.

2 Concept 3.7.2: Simple Controllers

2.1 Example 1: Placeholder

This section will contain worked examples for the Simple Controllers concept.

Problem: Example problem statement will be added here.

Solution: Example solution will be added here.

3 Concept 3.7.3: PID Control

3.1 Example 1: Placeholder

This section will contain worked examples for the PID Control concept.

Problem: Example problem statement will be added here.

Solution: Example solution will be added here.

4 Concept 3.7.4: Anti-Windup

4.1 Example 1: Placeholder

This section will contain worked examples for the Anti-Windup concept.

Problem: Example problem statement will be added here.

Solution: Example solution will be added here.

5 Concept 3.7.5: Implementation

5.1 Example 1: Placeholder

This section will contain worked examples for the Implementation concept.

Problem: Example problem statement will be added here.

Solution: Example solution will be added here.
